Summary

MCA Graduate with hands-on experience in full-stack web development and AI-powered applications. Skilled in React.js, Python, FastAPI, JavaScript, MySQL, and REST APIs with experience building responsive and secure web applications. Developed projects including an ATS Resume Analyzer AI and an Employee Management Portal featuring authentication, role-based access control, resume parsing, and real-time data management. Aspiring Software Engineer passionate about problem-solving and scalable application development.

Education

Thakur Institute of Management Studies, Career Development & Research Master of Computer Applications (MCA)	April 2026 CGPA: 8.25
L. S. Raheja College of Arts & Commerce B.Sc. Information Technology	March 2024 CGPA: 7.28
Patuck Technical High School & Junior College HSC (Science)	March 2021 Percentage: 73%

Technical Skills

Programming Languages: JavaScript, Python
Frontend Development: HTML, CSS, React.js, Tailwind CSS
Backend Development: FastAPI, REST API
Databases: MySQL, MongoDB
Tools & Platforms: GitHub, VS Code, Google Colab, Vercel
AI Tools: Claude Code, OpenAI Codex, ChatGPT

Projects

ATS Resume Analyzer AI - Live Project Tech Stack: HTML, CSS, JavaScript, PDF.js	Link March 2026
- Developed an AI-powered ATS Resume Analyzer that evaluates resumes against job descriptions using weighted scoring logic inspired by real ATS systems. - Implemented PDF/DOCX/TXT resume parsing, keyword extraction, missing skill detection, ATS score calculation, and real-time resume feedback generation. - Built dynamic job recommendation links for LinkedIn, Naukri, Internshala, and Google Jobs based on detected roles and locations. - Designed a responsive drag-and-drop interface with client-side processing to ensure data privacy and seamless cross-device usability.	
Employee Management Portal - Full Stack Project Tech Stack: React, Tailwind CSS, Python, FastAPI, MySQL	Link Nov 2025
- Developed a full-stack Employee Management System with role-based dashboards for admins and employees using React, Python (FastAPI), and MySQL. - Implemented JWT authentication, secure password hashing, login logout protection, employee account management, and task assignment workflows. - Built RESTful APIs with FastAPI and SQLAlchemy to manage employees, salaries, task tracking, and real-time status updates. - Designed a responsive UI with Tailwind CSS enabling admins to manage workforce operations and employees to track assigned tasks efficiently.	

Certifications

Data Analytics with Python	Apr 2025
Web Designing with Bootstrap	March 2023
Introduction to Machine Learning	Sep 2023
Programming Logic Building	Apr 2022
